Overweight Charges for Container Service

If a franchised hauler identifies that a customer's disposal weights are consistently in excess of 155 lbs. per loose yard (if charging loose container rates) or 550 lbs. per compacted yard, or per yard of heavy material such as dirt, rock, etc. (if charging compactor container rates) the hauler may charge a flat overweight surcharge in addition to the regular rates. The surcharge will be equal to the weight in excess of 300 lbs. per loose yard or 700 lbs. per compacted yard, multiplied by the current disposal rate per pound, multiplied by the number of yards serviced per month. The surcharge may also be applied to any extra or special pick-ups. Overweight charges may be assessed immediately upon the determination by the hauler that the container is overweight. Such determination may be based on the judgment of the hauler that the container exceeds the acceptable weight. All overweight determinations will be documented by the hauler by submitting a letter to the customer and a copy to the City Manager's Office.
